## Jesús Calleja conquered Everest and the Seven Peaks

---

### CLIENT

Well-known mountaineer, adventurer and presenter Jesús Calleja, renowned for his ascent of Everest and the Seven Peaks, the highest mountains on each continent and North America and Antarctica asked DAVANTIS to supply our perimeter protection analytics software.

DAVANTIS always provides end-to-end advice on project design, identifying the optimal solution for your own needs and those of your facilities.

---

Our solutions  
protect any  
perimeter  
quickly and  
efficiently

---

### A CHOICE OF SOLUTIONS

DAVANTIS has always aimed to provide bespoke solutions for each type of customer. From small, residential and industrial sites which can be protected with a small number of Daview MINI cameras, to larger areas, where Daview S can analyse input from endless cameras, with limitless possibilities on the number of channels and hardware.

Since we always focus on perimeter protection, we'd also like to mention interior spaces.

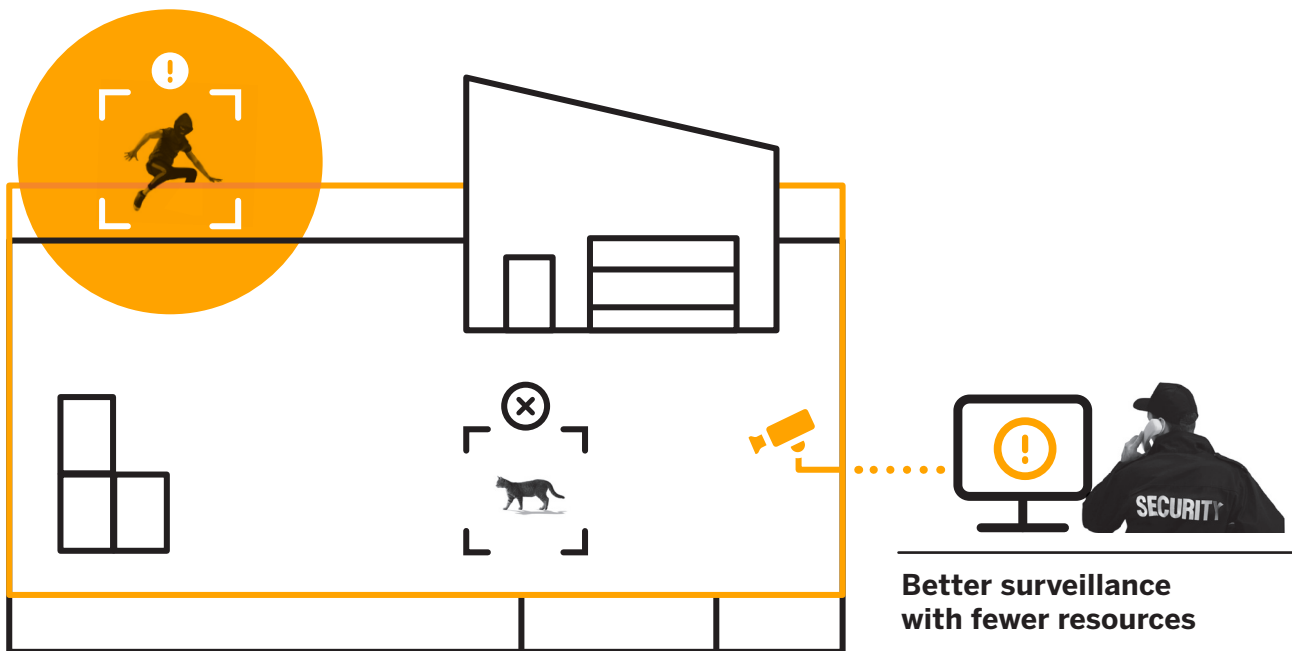

DAVANTIS solutions are an interesting option to protect for any large enclosed site.

Places where materials are often located in different spots.

Large buildings are vulnerable because of the large number of windows and doors, which are attractive to intruders, when conventional barrier, magnetic and volumetric systems can entail a lot of manpower.

A combination of IP technology and Daview systems will protect your facilities quickly and efficiently.

We are sure that Jesús Calleja's helicopter sleeps peacefully at night.

### Click 1

**Snapshot**  
with a box highlighting the cause of the alarm.

### Click 2

**Video**  
of the alarm at the activation point.

### Click 3

**Live access**  
to the camera for immediate verification.

Once the alarm has been verified, the system activates dissuasive devices

#### BENEFITS FOR INSTALLERS

Technology adaptable to all types of sites.

For both irregular and uneven exterior spaces and in interior spaces with material mobility, the DAVANTIS solution adapts to every situation.

Installers can adjust the solutions remotely without having to travel to the physical facilities.

#### BENEFITS FOR END USERS

Total privacy in your installation. The Alarm Receiving Centre can only access live cameras in case of an alarm for verification.

Dissuasive measures are activated to ensure proactive action in case of a real alarm.
