

# DAVANTIS integration with Hikvision speakers —

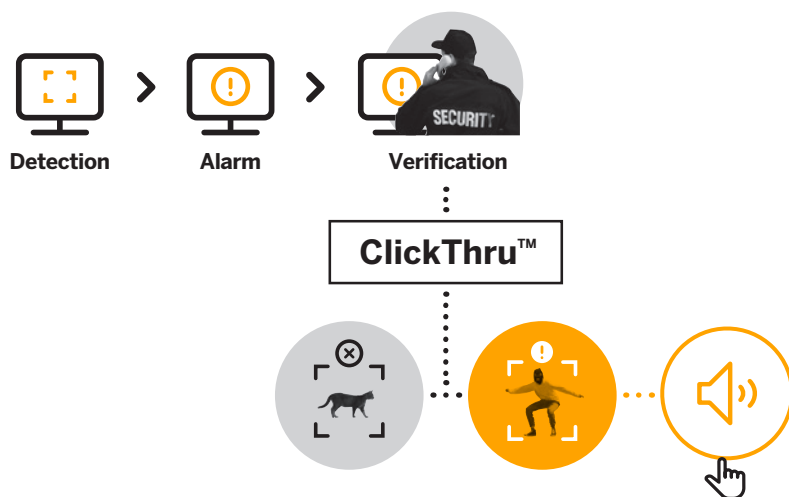

DAVANTIS continuously adapts and upgrades to offer you even more free features and services. This time, our product development team has increased the flexibility of DAVANTIS solutions by integrating **Hikvision DS-QAZ1307G1-E IP speakers**. Integrating these IP speakers with our intelligent video analysis system makes upgrading your perimeter video surveillance systems with deterrent measures like child's play.

This new integration strengthens our position as a fully integrable video analysis system compatible with a wide variety of hardware and software, as well as CMS, PSIM, and VSM platforms. Improving your perimeter security with DFUSION and Hikvision IP speakers couldn't be easier!

## Hikvision IP Speakers: an effective deterrent against intruders

The Hikvision DS-QAZ1307G1-E model is an **IP speaker** that is the perfect deterrent for maximising perimeter security.

This IP speaker supports alarm input and scheduling, audio linkage, TTS voice synthesis, and text broadcasting. It features both natural and soft dual audio options, standard male and female. It is also compatible with two-way audio

through the Session Initiation Protocol (SIP), enabling interactive communication between users and the system. This feature is essential for applications that require smooth, real-time communication, such as intercom systems and remote assistance.

Combine DFUSION with these speakers for **automatic and supervised activation of alert messages and deterrents in response to specific break-ins** detected by the cameras.

## DFUSION-Hikvision Speakers: maximum security through integration

Combining deterrents like speakers, lights, and other devices is an effective strategy for improving perimeter security levels around any site. The goal when triggering these is to startle intruders and send them running by deterring them from continuing with their unlawful activities. DFUSION automatically activates these measures when it detects

---

*DFUSION enables automatic activation of deterrent devices upon detection of motion or suspicious behavior, providing an immediate response that increases the effectiveness of intrusion prevention*

---

movement or suspicious behaviour and **responds instantly to improve intrusion prevention**. This enables security personnel to take action remotely, optimising resources by making it unnecessary to send patrols and security staff to the alert location.

Our integration with **intelligent video analysis systems** with Hikvision speakers allows you to customise your settings, so deterrents can only be activated when real threats are detected. This **significantly reduces false alarms and enables your security staff to work smart**.

## DFUSION: Integration for effective perimeter security

This integration is part of our commitment to providing advanced security solutions. DFUSION improves the accuracy and efficiency in the early intruder detection of intruders while covering the specific needs of each perimeter protection installation. What's more, it's compatible with an enormous range of hardware devices and security management platforms. Try DFUSION and upgrade your perimeter security!

### BENEFITS

---

Wireless installation

Quick, easy setup

Low-cost installation

Remote automation for real time audio messages

Effective deterrent to prevent bad behaviour
