

# Security Trailers

DAVANTIS partner in the USA

Security Trailers is a full-service security systems and monitoring provider, servicing Oklahoma and surrounding states.

They specialize in securing construction sites, with large unsecured areas where high-value equipment and materials have to be stored out of necessity.

---

## Securing Construction Sites

---

Security Trailers specializes in construction site video monitoring using virtual guards. Their real-time construction camera monitoring units and monitoring service, reduces crime at construction sites - saving construction companies tens of thousands of dollars, each year.

Their goal is to stop construction site theft and vandalism, by providing monitored security trailers and jobsite cameras, linked to remote monitoring services. Security Trailers

use the most advanced technologies, and installation best practices to secure these challenging sites.

They offer construction companies peace of mind, knowing that their assets are secure. Clients benefit by avoiding costly theft and/or vandalism, ensuring that budgets are not overrun, reducing insurance premiums and getting faster law enforcement response in the event of intrusions (reacting on video verified information).

---

Accurate  
detections  
ensures optimal  
monitoring  
staff efficiency

---

The most recent project that Video Alarm Systems secured with a DAVANTIS detection analytic solution, is ROSE STATE COLLEGE in Oklahoma.

Rose State College is a public institution with an “open-door” admissions policy. The school offered its first classes in 1970 – now 50 years old. Initially called

Mid-Del Junior College, it was renamed Oscar Rose Junior College in memory of the Midwest City-Del City Superintendent of Schools. In April 1983, the name was officially changed to Rose State College. Today, Rose State welcomes more than 13,000 students each year and is dedicated to helping each and every student succeed.

“

*DAVANTIS has dramatically reduced our false positive rates which directly translates to lower monitoring expenses, faster response times, and happier customers. The DAVANTIS team stands proudly behind their solutions and has provided advanced support to our team every step of the way. We are happy to be partnered with DAVANTIS and to bring their advanced video analytics to the Oklahoma, Texas, Arkansas, Kansas, and Missouri markets.*

”

**Antonio Dominguez**, President, Security Trailers

“

*The DAVANTIS MINI unit is a good fit due to its small form-factor, and low voltage power requirement. In addition it does not require constant streaming of video over an expensive cellphone connection, and having to respond only to accurate detections ensures optimal monitoring staff efficiency.*

”

**Lee Staus**, Director of mobile surveillance,  
Security Trailers

After comprehensive evaluation of the DAVANTIS detection analytics, and once certain that it would accurately detect intrusions in a construction environment without generating extensive false alarms, Video Alarm Systems installed a MINI in one of their mobile detection units – guarding this construction site.

The DAVANTIS MINI unit is a 4-channel detection appliance, configured to

---

## Highly Satisfied Client

---

detect people and/or vehicles that move into specific no-go zones after hours, and it is activated on a timed schedule.

During the construction period, several ‘intrusions’ were accurately detected, with most being curious passers-by. They were then requested to leave through the remote audio feature. Two incidents required dispatch of law enforcement, and in each case the intruders left the scene as soon as they were notified that police were on their way. No losses were suffered in either incident.

The Video Alarm Systems mobile unit fitted with the DAVANTIS MINI analytic appliance, safely protected this difficult construction site with very few false alarms having been transmitted to the remote monitoring station. The construction client was highly satisfied with their low-cost investment to keep their assets safe.

## **BENEFITS FOR INSTALLERS**

- Easy setup for calibration, rules
- Easy to fine-tune
- Comprehensive technical documents
- Advising and guiding you through every phase of the project, starting with the sales visit, through system design, planning and commissioning.

## **BENEFITS FOR END USERS**

- Low rate of false positives
- Mobile app support
- Easy operation
- Flexible rules to cover most scenarios

# DAVANTIS verification process
